

Your Journey Starts Here...

This is the first step toward the education and training you need to enter the Maritime and Logistics industry

PORT HOUSTON
THE INTERNATIONAL PORT OF TEXAS

Four Sectors of the Maritime Industry

PORTS & LOGISTICS

Ports and maritime-related transportation logistics move everything we use as a society from the location of raw materials, to areas of production and finally to market where the goods are sold. Our ports and transportation systems are intermodal - moving from ship to train to the roads on semi-trailers and back again. We move raw materials and finished goods to be sold to all corners of the globe. The transportation and logistics industry are dynamic places to work where change is the constant.

MARINER & SEA-GOING

There are many careers that will allow you to have an interesting and dynamic career - while traveling the world on the high seas. Everything from maintaining massive engines that power large ships, to piloting vessels or cooking meals for those on board are available jobs for those who want to travel the globe via the high seas. Some jobs require specific Coast Guard certifications and study through our nation's maritime institutions while others require a passport, security clearance and a willingness to work.

CRUISE SHIPS & RECREATIONAL BOATING

The cruise industry is a highly profitable international activity, and the fastest growing sector of the travel, tourism and leisure industry. The area of recreational boating is no different. There is a large industry in the United States that designs, produces, repairs and maintains cruise ships and yachts. Mechanics, designers, engineers, service technicians and marina personnel all work to keep the cruise and recreational boating industry moving to destinations all over the world.

SHIPBUILDING & SHIP REPAIR

The shipbuilding and ship repair industries are some of our nation's largest and most dynamic employers. These industries build and repair all types of sea-going vessels from aircraft carriers to submarines, from cargo ships to tugs and barges. This industry takes on large-scale projects that need a workforce that is flexible, dynamic and motivated. Careers in shipbuilding and ship repair provide skilled workers with an excellent wage and career opportunities.
